ENVIRONMENTAL SCIENCE 101

Course materials

Autumn term. Sample syllabus for a fictional course.

Schedule

WEEK 1	The water cycle, from rain to river
WEEK 2	Soils and how water moves through them
WEEK 3	Forests, wetlands and storage
WEEK 4	Cities and runoff
WEEK 5	Field trip and data collection
WEEK 6	Designing with water

Assessment

- Two short essays
- One field report
- A final group presentation

Reading list

- Course reader, units 1 to 6
- Lecture recordings, shared after each class
- Field guide to local rivers

How to submit work

Upload your file and paste the link in the class portal. Use one link per assignment, and replace the file if you need to resubmit.
